ABOUT ME

I'm a Highly motivated and enthusiastic frontend development fresher with a strong foundation in programming and a passion for solving complex problems. Proficient in multiple programming languages and eager to learn new technologies. Excellent collaboration and communication skills, combined with a strong attention to detail. A fast learner with a strong work ethic and a commitment to delivering high-quality software solutions. Seeking an opportunity to contribute to a dynamic team and gain practical experience in the development field.

PROJECTS :

A web scraping software and website for my college:

I just create a web scraping project using python for my college final year project, which scrape and collect data from university website and store it in tabular form. And further i converted it into a website using php which do the same process and make it fully functional

E-Commerce website for a client :

I had a chance to create a client project which is an e-commerce website based on affiliate marketing and multi-level marketing. we use wordpress as a core to build this site and main objective affiliate marketing is done with the plugin ultimate affiliate pro.

A service based E-commerce website

Then I Got a chance to work with a huge project named as go2do which is a home appliances service booking website. I worked as a frontend developer for creating a seamless ui on the project using react js as front end framework.
